Profile

Passionate about Data Science and Software Development, I'm driven by curiosity and a love for innovation. With a strong interest in leveraging AI for problem-solving, I demonstrate dedication to continuous learning and growth in these dynamic fields.

Education

University of Greenwich

2017 - 2022

Bachelor of Computer Science

United Kingdom

Modern Science and Arts University

2017 – 2022

Bachelor of Computer Science

Egypt

Experience

Madkour Apr 2023 - Dec 2024

Junior Full-Stack Developer

Cairo, Egypt

- Junior Full Stack Developer in a newly established department, tasked with crafting and deploying a comprehensive organizational system using ERPNext and Frappe frameworks.
- Responsibilities encompass diverse aspects of software development and system integration.
- Valuable experience gained in working on electricity and water meters, utilizing ERPNext, Node-RED, and ThingsBoard for efficient data management and monitoring.
- Contributions to seamless integration of systems, enhancing functionality and usability.
- Under the guidance of my manager, led the development of a mobile payment application, enabling users to conveniently recharge their electricity and water meters directly from their smartphones.

ERPCloud Systems

Nov 2022 - Apr 2023

Backend Developer

Cairo, Egypt

- Generated SQL Reports for different clients across ERPNext's huge database.
- Increase the performance of some of previous reports using SQL.
- Translated ERPNext processes into API endpoints for the first ERPNext mobile app (NextApp) and achieved the tight deadline of the first release.
- Customized the behavior of different modules on the client and server side of ERPNext.

Diplomas

Certified Data Scientist Professional

Epsilon AI | Nov 2022 - Oct 2023 | Cairo, Egypt

- Completed an extensive data science diploma covering Python programming, web scraping, databases, mathematics, exploratory data analysis, data visualization, machine learning, software engineering, and career development.
- Applied knowledge through real-world projects and a capstone project, demonstrating hands-on expertise in each module.

Certificates

Successfully met the requirements to be recognized as a Certified Data Scientist Professional.

Languages

English: Very GoodArabic: Native

Technical Skills

- Programming Languages: Python, C#, C++, Java, SQL, JavaScript
- Data Analysis: Pandas, NumPy, Plotly, Seaborn, Matplotlib
- Databases: MariaDB, PostgreSQL, MongoDB
- Business Intelligence: Power BI, Data Visualization, Reporting Dashboards
- Frameworks & Libraries: Frappe, ERPNext, Node.js, Express
- Tools & Technologies: Docker, Jira, Node-RED, ThingsBoard, CSS, RPA, UiPath
- Methodologies: Agile, Data Modeling, Data Wrangling

Projects

• Lung Cancer Prediction and Detection | Machine Learning & Deep Learning (Graduation Project)

Developed a predictive model for lung cancer using machine learning algorithms like SVM, KNN, and Logistic Regression. Implemented a CNN-based deep learning model for accurate detection.

Age Dataset Analysis: Life, Work, and Death of 1.22M People | Data Analysis

Conducted data preprocessing and analysis on a dataset spanning historical records from ancient times to the present.

Credit Risk Analysis & Clustering | Machine Learning & Data Analysis

Improved credit risk assessment by combining unsupervised learning with logistic regression, optimizing customer acquisition strategies for a credit card company.

Loan Default Prediction | Machine Learning & Data Analysis

Participated in the Coursera Loan Default Prediction Challenge, leveraging machine learning techniques on a dataset with 255,347 records to enhance predictive analytics in the financial sector.

Bank Dataset Analysis | Data Analysis

Performed data engineering, analysis, and visualization to extract insights from a bank dataset.

Grocery Store Management System | C#

Developed an application enabling admins to manage fruit and vegetable inventory while allowing users to add items to their cart and complete purchases.

School Management System | Java

Designed a system for schools, allowing teachers to schedule exam timings and manage academic activities.

Trivia | C#

Built a console-based trivia quiz with 10 astronomy questions. Used a QA class for question management, validated user responses, and tracked correct answers. Demonstrated Java, user input handling, and modular programming.

Real-Time Weather Dashboard | Python & Flask

Built a real-time weather dashboard that integrates with a weather API to display live temperature, humidity, and conditions, enhancing skills in web development, API integration, and data visualization.

Atm | Java

Developed a console-based ATM application handling deposits, withdrawals, balance checks, and PIN validation. Implemented OOP principles with a modular structure (UI and logic layers). Demonstrated Java proficiency, input handling, and error prevention for overdrafts.
